

Dear Prospective buyers,

This is the second home my husband and I have fixed up while raising our kids and while he works full time. We have really enjoyed designing it picking finishes creating custom furniture for it and doing all the work ourselves.

We have really enjoyed living in this house in this neighborhood in Benicia. It's safe and quiet. During covid the yard and the peace have been so beneficial to us and our kids. The size of the home has given us the opportunity to have my Mother live with us and regular visitors. We made a huge veggie garden last year and then planted wildflowers and draught tolerant plants in the spring.

We have all loved the yard and the trees. I enjoy sitting in the dining room and looking out at treetops and sitting in bed and being surrounded by trees. The big tree in the back, an Australian Kirajong tree has beautiful seed pods on it and makes a lovely sound when the wind blows. When it blooms it has small bell shaped flowers on it.

The master bathroom is a haven of mine. I want to bring it with me. Hope you enjoy it as much as we do.

We have had many family gatherings in our big kitchen and lovely back yard. Lots of love in this house we have cooked and baked lovely things in the oven and eaten countless meals at the island.

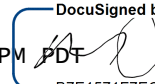

We enjoy hearing the wild Turkeys and seeing hawks land on the trees and the fence.

We have been very happy in this home and hope you will to!

Our Best,
